# Cromulatron

*Release 0.1.0*

October 10, 2016

|          |   |           |
|----------|---|-----------|
| <b>1</b> | <b>Overview</b>                         | <b>1</b>  |
| 1.1      | Installation . . . . .                  | 1         |
| 1.2      | Documentation . . . . .                 | 1         |
| 1.3      | Development . . . . .                   | 1         |
| <b>2</b> | <b>Installation</b>                     | <b>3</b>  |
| <b>3</b> | <b>Usage</b>                            | <b>5</b>  |
| <b>4</b> | <b>Reference</b>                        | <b>7</b>  |
| 4.1      | cromulatron . . . . .                   | 7         |
| <b>5</b> | <b>Contributing</b>                     | <b>9</b>  |
| 5.1      | Bug reports . . . . .                   | 9         |
| 5.2      | Documentation improvements . . . . .    | 9         |
| 5.3      | Feature requests and feedback . . . . . | 9         |
| 5.4      | Development . . . . .                   | 9         |
| <b>6</b> | <b>Authors</b>                          | <b>11</b> |
| <b>7</b> | <b>Changelog</b>                        | <b>13</b> |
| 7.1      | 0.1.0 (2016-10-10) . . . . .            | 13        |
| <b>8</b> | <b>Indices and tables</b>               | <b>15</b> |
|          | <b>Python Module Index</b>              | <b>17</b> |

---

## Overview

---

|         |  |
|---------|--|
| docs    |  |
| tests   |  |
| package |  |

A Twitter bot that posts sentences for grammaticality judgments.

- Free software: BSD license

## 1.1 Installation

```
pip install cromulatron
```

## 1.2 Documentation

<https://cromulatron-bot.readthedocs.io/>

## 1.3 Development

To run the all tests run:

```
tox
```

Note, to combine the coverage data from all the tox environments run:

|         |  |
|---------|--|
| Windows | set PYTEST_ADDOPTS=--cov-append<br>tox |
| Other   | PYTEST_ADDOPTS=--cov-append tox        |

---

### Installation

---

At the command line:

```
pip install cromulatron
```

---

### Usage

---

To use Cromulatron in a project:

```
import cromulatron
```

---

**Reference**

---

**4.1 cromulatron**

---

## Contributing

---

Contributions are welcome, and they are greatly appreciated! Every little bit helps, and credit will always be given.

### 5.1 Bug reports

When [reporting a bug](#) please include:

- Your operating system name and version.
- Any details about your local setup that might be helpful in troubleshooting.
- Detailed steps to reproduce the bug.

### 5.2 Documentation improvements

Cromulatron could always use more documentation, whether as part of the official Cromulatron docs, in docstrings, or even on the web in blog posts, articles, and such.

### 5.3 Feature requests and feedback

The best way to send feedback is to file an issue at <https://github.com/jkahn/cromulatron-bot/issues>.

If you are proposing a feature:

- Explain in detail how it would work.
- Keep the scope as narrow as possible, to make it easier to implement.
- Remember that this is a volunteer-driven project, and that code contributions are welcome :)

### 5.4 Development

To set up *cromulatron-bot* for local development:

1. Fork [cromulatron-bot](#) (look for the “Fork” button).
2. Clone your fork locally:

```
git clone git@github.com:your_name_here/cromulatron-bot.git
```

3. Create a branch for local development:

```
git checkout -b name-of-your-bugfix-or-feature
```

Now you can make your changes locally.

4. When you're done making changes, run all the checks, doc builder and spell checker with `tox` one command:

```
tox
```

5. Commit your changes and push your branch to GitHub:

```
git add .
git commit -m "Your detailed description of your changes."
git push origin name-of-your-bugfix-or-feature
```

6. Submit a pull request through the GitHub website.

### 5.4.1 Pull Request Guidelines

If you need some code review or feedback while you're developing the code just make the pull request.

For merging, you should:

1. Include passing tests (run `tox`)<sup>1</sup>.
2. Update documentation when there's new API, functionality etc.
3. Add a note to `CHANGELOG.rst` about the changes.
4. Add yourself to `AUTHORS.rst`.

### 5.4.2 Tips

To run a subset of tests:

```
tox -e envname -- py.test -k test_myfeature
```

To run all the test environments in *parallel* (you need to `pip install detox`):

```
detox
```

---

<sup>1</sup> If you don't have all the necessary python versions available locally you can rely on Travis - it will [run the tests](#) for each change you add in the pull request.  
It will be slower though ...

---

**Authors**

---

- Jeremy G. Kahn - <http://trochee.net/cromulatron>

---

## Changelog

---

### 7.1 0.1.0 (2016-10-10)

- First release on PyPI.

---

## Indices and tables

---

- `genindex`
- `modindex`
- `search`
